

Задания для проведения тестирования (2 ЧАСТЬ)

ЗАДАНИЕ 1 ТИПА – ВЫПОЛНЕНИЕ ТЕСТОВЫХ ЗАДАНИЙ ЗАКРЫТОГО ТИПА

№ п/п	Содержание вопроса	Варианты ответов	Правильный ответ	Результат обучения	Время выполнения (мин.)
1.	Choose the correct variant. What is the main purpose of using mathematical methods in economics?	A) To confuse students B) To make economic models more accurate C) To make economics more difficult D) To replace traditional economic theories	B	РД-1 РД-2 РД-3	1
2.	Choose the correct variant. Which of the following functions is commonly used to represent the demand curve in economics?	A) Linear function B) Exponential function C) Quadratic function D) Trigonometric function	A	РД-1 РД-2 РД-3	1
3.	Choose the correct variant. In economics, what does the symbol Σ represent?	A) Integration B) Summation C) Derivation D) Multiplication	B	РД-1 РД-2 РД-3	1
4.	Choose the correct variant. What is the purpose of using calculus in economics?	A) To calculate profit margins B) To analyze changes in economic variables C) To create barriers to entry in the market D) To determine the best advertising strategy	B	РД-1 РД-2 РД-3	1
5.	Choose the correct variant. Which mathematical concept is used to measure the responsiveness of one variable to changes in another variable in economics?	A) Covariance B) Correlation C) Elasticity D) Regression	C	РД-1 РД-2 РД-3	1
6.	Choose the correct variant. What is the derivative of a constant function in calculus?	A) 1 B) 0 C) The derivative is undefined D) The derivative is infinity	B	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
7.	Choose the correct variant. Which of the following is an example of a multivariable function in economics?	A) Total cost as a function of quantity produced B) Inflation rate over time C) Consumer spending as a function of income D) Demand as a function of price	A	РД-1 РД-2 РД-3	1
8.	Choose the correct variant. In economic modeling, what does the term "ceteris paribus" mean?	A) All variables change simultaneously B) All variables remain constant except the one being studied C) Only one variable changes at a time D) No variables change	B	РД-1 РД-2 РД-3	1
9.	Choose the correct variant. Which of the following mathematical concepts is used to find the optimal solution in linear programming?	A) Integration B) Derivatives C) Matrices D) Probability	C	РД-1 РД-2 РД-3	1
10.	Choose the correct variant. What does the term "marginal" refer to in economics?	A) A small incremental change B) The average value of a variable C) The total value of a variable D) A large-scale change	A	РД-1 РД-2 РД-3	1
11.	Choose the correct variant. In economics, what role does game theory play?	A) It models the strategic interactions between different economic agents B) It calculates the average utility of a population C) It determines the equilibrium price in a market D) It analyzes the historical performance of financial markets	A	РД-1 РД-2 РД-3	1
12.	Choose the correct variant. Which of the following mathematical concepts is used to model uncertainty in economics?	A) Probability theory B) Trigonometry C) Limit theory D) Hyperbolic functions	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
13.	Choose the correct variant. When economists use the term "equilibrium," what are they referring to?	A) The balance between supply and demand B) The maximum value of a function C) The point where a function intersects the x-axis D) The lack of government intervention in the market	A	РД-1 РД-2 РД-3	1
14.	Choose the correct variant. Which type of mathematical series is often used to represent the accumulation of wealth over time in economics?	A) Arithmetic series B) Geometric series C) Harmonic series D) Power series	B	РД-1 РД-2 РД-3	1
15.	Choose the correct variant. In econometrics, which mathematical technique is used to estimate the parameters of a statistical model?	A) Regression analysis B) Fourier analysis C) Wavelet analysis D) Singular value decomposition	A	РД-1 РД-2 РД-3	1
16.	Choose the correct variant. What is the purpose of using integration in economic analysis?	A) To find the derivative of a function B) To calculate the area under a curve C) To detect trends in economic data D) To determine the optimal level of production	B	РД-1 РД-2 РД-3	1
17.	Choose the correct variant. Which of the following concepts is used to measure the average rate of change of a variable in calculus?	A) Slope B) Area C) Volume D) Standard deviation	A	РД-1 РД-2 РД-3	1
18.	Choose the correct variant. Which type of equation is often used in economics to model exponential growth or decay?	A) Linear equation B) Quadratic equation C) Exponential equation D) Logarithmic equation	C	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
19.	Choose the correct variant. In economics, what is the purpose of using matrix algebra?	A) To calculate interest rates B) To solve systems of equations C) To analyze the elasticity of demand D) To forecast future economic grow	B	РД-1 РД-2 РД-3	1
20.	Choose the correct variant. Which of the following mathematical concepts is used to measure the dispersion of data points around the mean in statistics?	A) Variance B) Median C) Skewness D) Mode	A	РД-1 РД-2 РД-3	1
21.	Choose the correct variant. What is the main purpose of using mathematical models in economic analysis?	A) To make economic theories more complex B) To represent economic relationships in a simplified way C) To confuse policymakers D) To decrease the accuracy of economic predictions	B	РД-1 РД-2 РД-3	1
22.	Choose the correct variant. In calculus, what does the second derivative of a function measure?	A) The slope of the tangent line to the function B) The concavity of the function C) The area under the curve of the function D) The mean value of the function	B	РД-1 РД-2 РД-3	1
23.	Choose the correct variant. Which of the following mathematical concepts is used to calculate the average value of a function over an interval?	A) Mean value theorem B) Fundamental theorem of calculus C) Intermediate value theorem D) Ratio test	A	РД-1 РД-2 РД-3	1
24.	Choose the correct variant. What is the purpose of using partial derivatives in economics?	A) To calculate the total change in a function B) To analyze the relationship between variables holding other variables constant C) To approximate the value of a function near a point D) To simplify the calculation of integrals	B	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
25.	Choose the correct variant. Which of the following mathematical concepts is commonly used to model the accumulation of capital over time?	A) Compound interest B) Random walk C) Fourier series D) Taylor series	A	РД-1 РД-2 РД-3	1
26.	Fill in the gap with the most appropriate word combination. In economics linear programming _____	A) maximizes or minimizes a linear objective function subject to linear constraints B) constructs budget lines for consumers C) measures the average cost of production D) analyzes the distribution of income in society	A	РД-1 РД-2 РД-3	1
27.	Fill in the gap with the most appropriate word combination. _____ is commonly used to represent the production function in economics.	A) Exponential function B) Logarithmic function C) Cobb-Douglas function D) Sine function	C	РД-1 РД-2 РД-3	1
28.	Fill in the gap with the most appropriate word combination. The main purpose of using statistical inference in economic analysis is _____	A) To estimate the future value of a variable B) To draw conclusions about a population based on a sample C) To calculate the standard deviation of economic data D) To test the hypothesis that demand equals supply	B	РД-1 РД-2 РД-3	1
29.	Fill in the gap with the most appropriate word combination. _____ is used to analyze time series data in economics.	A) Autoregressive integrated moving average (ARIMA) modeling B) Differential equations C) Laplace transforms D) The method of least squares	A	РД-1 РД-2 РД-3	1
30.	Fill in the gap with the most appropriate word combination. In economic analysis	A) helps to find the best possible outcome given constraints B) measures the average utility of consumers C) calculates the equilibrium	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	optimization _____	price in a market D) determines the total value of a variable			
31.	Fill in the gap with the most appropriate word combination. A comprehensive plan for identifying relevant studies in economics research is _____	A) Selection Bias B) Heterogeneity C) Search strategy D) Sine function	C	РД-1 РД-2 РД-3	1
32.	Fill in the gap with the most appropriate word combination. The concept of "marginal cost" in economics refers to _____	A) The total cost of producing one more unit of a good or service B) The average cost of production C) The cost of a specific resource D) The total cost of production	A	РД-1 РД-2 РД-3	1
33.	Fill in the gap with the most appropriate word combination. The concept of "time value of money" in economics refers to _____	A) The value of money is static over time B) The value of money increases over time C) The value of money decreases over time	C	РД-1 РД-2 РД-3	1
34.	Fill in the gap with the most appropriate word combination. In economics, the concept of "externalities" refers to _____	A) The costs associated with producing a good or service B) The costs of market transactions C) The side effects or consequences of economic activities that affect third parties D) The costs of international trade	C	РД-1 РД-2 РД-3	1
35.	Fill in the gap with the most appropriate word combination. Companies _____ can effectively manage their risks by _____	A) Ignoring potential risks B) Developing a risk management plan C) Delegating all responsibility to a single individual D) Avoiding seeking outside advice	B	РД-1 РД-2 РД-3	1
36.	Fill in the gap with the most appropriate word combination.	a) Joint-stock company b) Partnership c) Subsidiary company	C	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	A _____ is an association of two or more people in order to run a business.	d) Limited liability company			
37.	Fill in the gap with the most appropriate word combination. The slope of a curve at a point is given by _____	A) The derivative of the function B) The integral of the function C) The limit of the function D) The function itself	A	РД-1 РД-2 РД-3	1
38.	Fill in the gap with the most appropriate word combination. In economics, the term "equilibrium" refers to _____	A) A state where supply exceeds demand B) A state where demand exceeds supply C) A state where supply equals demand D) A state where there is no supply or demand	C	РД-1 РД-2 РД-3	1
39.	Fill in the gap with the most appropriate word combination. _____ is NOT a method used in mathematical economics to solve optimization problems?	A) Lagrange multipliers B) Differential equations C) Linear programming D) Fourier transforms	D	РД-1 РД-2 РД-3	1
40.	Fill in the gap with the most appropriate word combination. Utility theory in economics deals with _____	A) Maximizing profits B) Maximizing consumption C) Maximizing revenue D) Maximizing costs	B	РД-1 РД-2 РД-3	1
41.	Fill in the gap with the most appropriate word combination. When faced with a production problem, firms aim to maximize _____	A) Costs B) Revenue C) Output D) Profits	D	РД-1 РД-2 РД-3	1
42.	Fill in the gap with the most appropriate word combination.	A) Change in price relative to the change in quantity demanded B) Change in quantity demanded	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	The concept of elasticity measures the _____	relative to the change in price C) Change in quantity demanded relative to the change in income D) Change in income relative to the change in quantity demanded			
43.	Fill in the gap with the most appropriate word combination. In econometrics, we use regression analysis for _____	A) Estimating relationships between variables B) Calculating probabilities C) Predicting future values D) Analyzing historical data	A	РД-1 РД-2 РД-3	1
44.	Fill in the gap with the most appropriate word combination. _____ is a measure of central tendency.	A) Variance B) Standard deviation C) Mean D) Skewness	C	РД-1 РД-2 РД-3	1
45.	Fill in the gap with the most appropriate word combination. The concept of comparative advantage is based on _____	A) Absolute efficiency B) Relative efficiency C) Absolute advantage D) Urban advantage	B	РД-1 РД-2 РД-3	1
46.	Fill in the gap with the most appropriate word combination. The concept of opportunity cost refers to _____	A) The value of the best foregone alternative B) The cost of production C) The price in the market D) The total cost of inputs	A	РД-1 РД-2 РД-3	1
47.	Fill in the gap with the most appropriate word combination. _____ is used to solve a system of linear equations in matrix form.	A) Gradient descent B) Gauss-Jordan elimination C) Newton's method D) Fourier series	B	РД-1 РД-2 РД-3	1
48.	Fill in the gap with the most appropriate word combination. _____ is NOT a characteristic of a	A) Many buyers and sellers B) Homogeneous products C) High barriers to entry D) Perfect information	C	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	perfectly competitive market?				
49.	Fill in the gap with the most appropriate word combination. In game theory, a Nash equilibrium is _____	A) A state where players cooperate to achieve mutually beneficial outcomes B) An unstable outcome C) A stable outcome where no player has an incentive to deviate unilaterally D) A state of chaos and confusion	C	РД-1 РД-2 РД-3	1
50.	Fill in the gap with the most appropriate word combination. _____ is used to determine whether a regression model fits the data well?	A) ANOVA B) T-test C) Chi-square test D) F-test	D	РД-1 РД-2 РД-3	1
51.	Fill in the gap with the most appropriate word combination. The purpose of using mathematical models in economics is _____	A) Simplifying economic concepts B) Quantifying economic relationships C) Visualizing economic data D) Analyzing modern trends	B	РД-1 РД-2 РД-3	1
52.	Fill in the gap with the most appropriate word combination. _____ is commonly used to analyze optimization problems in economics.	A) Algebra B) Calculus C) Geometry D) Trigonometry	B	РД-1 РД-2 РД-3	1
53.	Fill in the gap with the most appropriate word combination. The primary objective of statistical analysis in economics is _____	A) To predict future economic trends B) To measure economic variables accurately C) To interpret economic theories D) To design economic policies	B	РД-1 РД-2 РД-3	1
54.	Fill in the gap with the most appropriate word combination.	A) Simplify economic concepts B) Measure economic variables accurately and gather empirical data	B	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	Data collection is important in economic research because companies are to _____	C) Visualize economic models D) Predict future economic trends			
55.	Fill in the gap with the most appropriate word combination. _____ is the most commonly used measure of central tendency in statistics.	A) Median B) Mode C) Mean D) Standard Deviation	C	РД-1 РД-2 РД-3	1
56.	Fill in the gap with the most appropriate word combination. The econometric models contribute to economic analysis by _____	A) Visualizing economic data B) Examining the relationship between economic variables and predicting outcomes C) Simplifying economic theories D) Measuring economic variables accurately	B	РД-1 РД-2 РД-3	1
57.	Fill in the gap with the most appropriate word combination. The purpose of using economic models is _____	A) Complicating economic theories B) Simplifying economic relationships and help in forecasting C) Restricting economic data D) Predicting economic trends	B	РД-1 РД-2 РД-3	1
58.	Fill in the gap with the most appropriate word combination. _____ is commonly used statistical technique for analyzing the relationship between two or more variables.	A) T-tests B) Chi-square tests C) Linear regression D) Analysis of variance	C	РД-1 РД-2 РД-3	1
59.	Fill in the gap with the most appropriate word combination. _____ is the primary goal of time-series analysis in economics.	A) Measuring changes in economic variables over time and make comparisons B) Analyzing cross-sectional data C) Visualizing economic trends D) Predicting future economic events	A	РД-1 РД-2 РД-3	1
60.	Fill in the gap with the most appropriate word	A) By analyzing consumer behavior	B	РД-1 РД-2	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	combination. The game theory models contribute to economic analysis _____	B) By analyzing strategic interactions and decision-making among rational individuals C) By predicting economic trends D) By visualizing economic data		РД-3	
61.	Fill in the gap with the most appropriate word combination. The primary objective of economic forecasting is _____	A) To analyze historical economic data B) To estimate future economic trends based on historical data and current conditions C) To predict economic events D) To interpret economic theories	B	РД-1 РД-2 РД-3	1
62.	Fill in the gap with the most appropriate word combination. _____ indicates the spread or dispersion of data points around the mean.	A) Range B) Median C) Standard deviation D) Mean absolute deviation	C	РД-1 РД-2 РД-3	1
63.	Fill in the gap with the most appropriate word combination. The statistical software programs _____ assist economists in data analysis _____	A) By making economic decisions for economists B) By analyzing economic data and estimating relationships between variables C) By visualizing economic models D) By simplifying economic theories	B	РД-1 РД-2 РД-3	1
64.	Fill in the gap with the most appropriate word combination. Applying _____ statistical techniques in economics is of great importance because _____	A) They complicate economic analysis B) They simplify statistical calculations and help in data interpretation C) They visualize economic data D) They predict future economic trends	B	РД-1 РД-2 РД-3	1
65.	Fill in the gap with the most appropriate word combination. Hypothesis testing in economic _____ research _____	A) Proves economic theories B) Evaluates the validity of economic hypotheses using statistical tests C) Simplifies economic concepts D) Visualizes economic models	B	РД-1 РД-2 РД-3	1
66.	Fill in the gap with the most appropriate word	A) To stimulate economic growth by reducing government	B	РД-1 РД-2	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	combination. The primary objective of monetary policy is _____	intervention B) To reduce inflation and stabilize prices C) To increase government spending and boost demand D) To regulate international trade		РД-3	
67.	Fill in the gap with the most appropriate word combination. _____ is used to measure the strength and direction of the relationship between two variables.	A) Time-series analysis B) Correlation analysis C) Regression analysis D) Factor analysis	B	РД-1 РД-2 РД-3	1
68.	Fill in the gap with the most appropriate word combination. The ceteris paribus assumption in economic analysis means _____	A) All other things being unequal B) All other things being irrelevant C) All other things being relevant D) All other things being equal	D	РД-1 РД-2 РД-3	1
69.	Fill in the gap with the most appropriate word combination. The cost-benefit analysis is commonly used in economics in order _____	A) To measure the total cost of production B) To evaluate the profitability of a business venture or public policy C) To analyze consumer preferences D) To predict future economic trends	B	РД-1 РД-2 РД-3	1
70.	Fill in the gap with the most appropriate word combination. The econometric models contribute to economic analysis _____	A) By predicting economic trends B) By identifying economic patterns and relationships C) By simplifying economic concepts D) By visualizing economic data	B	РД-1 РД-2 РД-3	1
71.	Fill in the gap with the most appropriate word combination. The term "fiscal policy" refers to _____	A) The management of interest rates by central banks B) The government's use of taxation and spending to influence the economy C) The regulation of international trade D) The control of money supply in the economy	B	РД-1 РД-2 РД-3	1
72.	Fill in the gap with the	A) The responsiveness of	A	РД-1	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	most appropriate word combination. The concept of elasticity measure in economics means _____	quantity demanded to changes in price B) The proportion of income spent on a good C) The total revenue generated by selling a good D) The degree of competition in a market		РД-2 РД-3	
73.	Fill in the gap with the most appropriate word combination. The primary objective of regression analysis in economics is _____	A) To estimate future economic trends B) To analyze the relationship between two or more variables C) To predict economic events D) To visualize economic data	B	РД-1 РД-2 РД-3	1
74.	Fill in the gap with the most appropriate word combination. _____ states that the true cost of something is the value of the next best alternative forgone.	A) Law of demand B) Law of supply C) Principle of comparative advantage D) Principle of opportunity cost	D	РД-1 РД-2 РД-3	1
75.	Fill in the gap with the most appropriate word combination. The production possibility frontier (PPF) _____	A) Illustrates the concept of economic equilibrium B) Represents the maximum output combinations of two goods that an economy can produce with its available resources C) Measures consumer preferences D) Predicts future economic trends	B	РД-1 РД-2 РД-3	1
76.	Fill in the gap with the most appropriate word combination. The term "utility" refers to _____	A) The total revenue generated by selling a good B) The degree of competition in a market C) The satisfaction or benefit derived from consuming a good or service D) The proportion of income spent on a good	C	РД-1 РД-2 РД-3	1
77.	Fill in the gap with the most appropriate word combination. The primary objective of a Lorenz curve in	A) To measure income inequality within a population B) To visualize the production possibilities of an economy C) To predict future economic trends	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	economics is _____	D) To estimate consumer preferences			
78.	Fill in the gap with the most appropriate word combination. The primary function of the Consumer Price Index (CPI) in economics is _____	A) Measuring changes in the prices of consumer goods and services over time B) Calculating the total output of an economy C) Estimating international trade balances D) Predicting future economic trends	A	РД-1 РД-2 РД-3	1
79.	Fill in the gap with the most appropriate word combination. The purpose of instrumental methods in economics is _____	A) To play musical instruments during economic conferences B) To measure economic variables accurately and gather empirical data C) To analyze economic theories without practical applications D) To ignore mathematical and statistical tools in economic research	B	РД-1 РД-2 РД-3	1
80.	Fill in the gap with the most appropriate word combination. The Solow growth model in economic analysis _____	A) Predicts future economic trends B) Measures changes in income distribution C) Analyzes long-term economic growth and productivity D) Evaluates consumer preferences	C	РД-1 РД-2 РД-3	1
81.	Fill in the gap with the most appropriate word combination. The primary purpose of microeconomics is _____	A) To study the behavior of individual consumers and firms B) To analyze the overall performance of the economy C) To determine the optimal allocation of resources by the government D) To predict changes in aggregate demand and supply	A	РД-1 РД-2 РД-3	1
82.	Fill in the gap with the most appropriate word combination. Statistical methods in economics are primarily used for _____	A) Predicting future economic trends B) Estimating the value of a company's stock C) Analyzing data and making inferences about economic phenomena D) Creating mathematical models of economic systems	C	РД-1 РД-2 РД-3	1
83.	Fill in the gap with the most appropriate word combination.	A) The measure of responsiveness of quantity demanded to changes in price B) The total revenue generated	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	The term "elasticity" refers to _____	by selling a good C) The average rate of change in GDP over time D) The ratio of government debt to GDP			
84.	Fill in the gap with the most appropriate word combination. The concept of externalities in economic analysis _____	A) Encourages firms to internalize costs and benefits B) Represents the unintended side effects of economic activities on third parties C) Has no relevance to economic decision-making D) Promotes government intervention in the economy	B	РД-1 РД-2 РД-3	1
85.	Fill in the gap with the most appropriate word combination. _____ is the purpose of the Human Development Index (HDI) in economics.	A) Measuring changes in consumer prices B) Measuring and comparing the overall development levels of different countries C) Calculating GDP growth rates D) Estimating income inequality	B	РД-1 РД-2 РД-3	1
86.	Fill in the gap with the most appropriate word combination. _____ is the formula for calculating the Consumer Price Index (CPI).	A) Total expenditure on consumption / Total population B) (Total value of basket in current year / Total value of basket in base year) * 100 C) Total value of exports - Total value of imports D) Total government spending on goods and services	B	РД-1 РД-2 РД-3	1
87.	Fill in the gap with the most appropriate word combination. _____ illustrates the relationship between saving, investment and interest rates?	A) Aggregate demand and aggregate supply model B) Mundell-Fleming model C) IS-LM model D) Solow growth model	C	РД-1 РД-2 РД-3	1
88.	Fill in the gap with the most appropriate word combination. _____ advocates for minimal government intervention in the economy and emphasizes the importance of free markets.	A) Keynesian economics B) Monetarism C) Supply-side economics D) Austrian economics	D	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
89.	Fill in the gap with the most appropriate word combination. The primary purpose of regression analysis in economics is _____	A) To calculate the average of a dataset B) To estimate the relationship between variables C) To measure income inequality D) To forecast future economic trends	B	РД-1 РД-2 РД-3	1
90.	Fill in the gap with the most appropriate word combination. The concept of externality in economic analysis _____	A) Measures changes in income distribution B) Evaluates consumer preferences C) Represents the unintended side effects of economic activities on third parties D) Visualizes the production possibilities of an economy	C	РД-1 РД-2 РД-3	1
91.	Fill in the gap with the most appropriate word combination. The concept of inflation affects the purchase power _____	A) By increasing the cost of living and reducing real income B) By decreasing the cost of living and increasing real income C) By stabilizing prices and income levels D) By reducing government intervention in the economy	A	РД-1 РД-2 РД-3	1
92.	Fill in the gap with the most appropriate word combination. GDP stand for _____	A) Gross Domestic Product B) General Demand Principle C) Global Development Protocol D) Generalized Demand Preference	A	РД-1 РД-2 РД-3	1
93.	Fill in the gap with the most appropriate word combination. The concept of comparative advantage plays a crucial role in international trade because it _____	A) Promotes protectionist trade policies B) Encourages countries to specialize in the production of goods and services in which they have a lower opportunity cost C) Reduces the efficiency of global markets D) Increases trade barriers	B	РД-1 РД-2 РД-3	1
94.	Fill in the gap with the most appropriate word combination. The way in which a company generates income from its products or services is called _____	A) Value proposition B) Revenue model C) Business model transformation D) Econometric modeling	B	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
95.	Fill in the gap with the most appropriate word combination. The primary objective of a utility function in economic analysis is _____	A) To measure income inequality within a population B) To predict future economic trends C) To visualize the production possibilities of an economy D) To represent consumer preferences and satisfaction levels	D	РД-1 РД-2 РД-3	1
96.	Fill in the gap with the most appropriate word combination. The term "monetary policy" refers to _____	A) Government spending on goods and services B) The use of interest rates and money supply to control inflation and stabilize the economy C) Taxation aimed at redistributing income D) International trade agreements	B	РД-1 РД-2 РД-3	1
97.	Fill in the gap with the most appropriate word combination. _____ states that "people face trade-offs"?	A) Law of demand B) Principle of comparative advantage C) Law of supply D) Principle of opportunity cost	D	РД-1 РД-2 РД-3	1
98.	Fill in the gap with the most appropriate word combination. The purpose of the Lorenz curve is _____	A) To measure changes in income inequality B) To forecast future economic growth C) To analyze the relationship between inflation and unemployment D) To calculate the GDP per capita	A	РД-1 РД-2 РД-3	1
99.	Fill in the gap with the most appropriate word combination. The primary objective of a Lorenz curve is _____	A) To measure income inequality within a population B) To visualize the production possibilities of an economy C) To predict future economic trends D) To estimate consumer preferences	A	РД-1 РД-2 РД-3	1
100.	Fill in the gap with the most appropriate word combination. The primary function of the Consumer Price Index (CPI) is _____	A) To measure changes in the prices of consumer goods and services over time B) To calculate the total output of an economy C) To estimate international trade balances D) To predict future economic trends	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
101.	Fill in the gap with the most appropriate word combination. _____ is often used to represent the relationship between two variables in economics.	A) Pythagorean theorem B) Quadratic equation C) Linear regression D) Trigonometric function	C	РД-1 РД-2 РД-3	1
102.	Fill in the gap with the most appropriate word combination. The primary objective of inflation targeting in monetary policy is _____	A) To maintain stable prices and control inflation rates B) To maximize employment levels C) To stimulate economic growth through government spending D) To regulate interest rates	A	РД-1 РД-2 РД-3	1
103.	Fill in the gap with the most appropriate word combination. The term "marginal utility" refers to _____	A) The total satisfaction derived from consuming a good or service B) The additional satisfaction gained from consuming one more unit of a good or service C) The proportion of income spent on a good D) The degree of competition in a market	B	РД-1 РД-2 РД-3	1
104.	Fill in the gap with the most appropriate word combination. The primary objective of a Gini coefficient is _____	A) To measure income inequality within a population B) To predict future economic trends C) To estimate consumer preferences D) To visualize the production possibilities of an economy	A	РД-1 РД-2 РД-3	1
105.	Fill in the gap with the most appropriate word combination. The concept of elasticity contributes to economic analysis _____	A) By measuring changes in income distribution B) By predicting historical economic trends C) By analyzing the responsiveness of quantity demanded to changes in price D) By evaluating consumer preferences	C	РД-1 РД-2 РД-3	1
106.	Fill in the gap with the most appropriate word combination. The primary function of the Gross Domestic	A) To measure changes in the prices of consumer goods and services over time B) To calculate the total output of an economy C) To estimate international trade	B	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	Product (GDP) is _____	balances D) To predict future economic trends			
107.	Fill in the gap with the most appropriate word combination. The concept of "comparative advantage" plays a crucial role in international trade because _____	A) It measures changes in income distribution B) It encourages countries to specialize in the production of goods and services in which they have a lower opportunity cost C) It calculates GDP growth rates D) It estimates international trade balances	B	РД-1 РД-2 РД-3	1
108.	Fill in the gap with the most appropriate word combination. The concept of scarcity influences economic decision-making _____	A) By ensuring unlimited resources are available to meet unlimited wants B) By encouraging efficient allocation of resources to fulfill unlimited wants C) By reducing the need for economic planning D) By increasing government intervention in the economy	B	РД-1 РД-2 РД-3	1
109.	Fill in the gap with the most appropriate word combination. The primary objective of a Phillips curve in economic analysis is _____	A) To measure income inequality within a population B) To visualize the production possibilities of an economy C) To predict future economic trends D) To analyze the relationship between inflation and unemployment	D	РД-1 РД-2 РД-3	1
110.	Fill in the gap with the most appropriate word combination. The term "opportunity cost" refers to _____	A) The total revenue generated by selling a good B) The value of the next best alternative forgone when a decision is made C) The proportion of income spent on a good D) The degree of competition in a market	B	РД-1 РД-2 РД-3	1
111.	Fill in the gap with the most appropriate word combination. The primary objective of a Cobb-Douglas production function is _____	A) To measure income inequality within a population B) To predict future economic trends C) To visualize the production possibilities of an economy D) To analyze the relationship between inputs and outputs in production	D	РД-1 РД-2 РД-3	1
112.	Fill in the gap with the	A) By predicting historical	B	РД-1	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	most appropriate word combination. The concept of equilibrium contributes to economic analysis _____	economic trends B) By identifying the point where supply equals demand in a market C) By analyzing consumer preferences D) By visualizing economic data		РД-2 РД-3	
113.	Fill in the gap with the most appropriate word combination. The primary function of the Producer Price Index (PPI) is _____	A) To measure changes in the prices of consumer goods and services over time B) To calculate the total output of an economy C) To estimate international trade balances D) To measure changes in the prices received by domestic producers for their output	D	РД-1 РД-2 РД-3	1
114.	Fill in the gap with the most appropriate word combination. The normal distribution in statistical analysis _____	A) Is used to predict economic recessions B) Represents the distribution of random variables in nature C) Allows economists to analyze economic data using statistical tests D) Is irrelevant to economic research	C	РД-1 РД-2 РД-3	1
115.	Fill in the gap with the most appropriate word combination. The concept of monetary policy contributes to economic stability _____	A) By reducing government intervention in the economy B) By regulating the money supply and interest rates to control inflation and stabilize prices C) By stimulating economic growth through government spending D) By promoting protectionist trade policies	B	РД-1 РД-2 РД-3	1
116.	Fill in the gap with the most appropriate word combination. The primary function of the Human Development Index (HDI) in economics is _____	A) To measure changes in the prices of consumer goods and services over time B) To calculate the total output of an economy C) To estimate international trade balances D) To measure and compare the overall development levels of different countries	D	РД-1 РД-2 РД-3	1
117.	Fill in the gap with the most appropriate word combination.	A) Registration B) Regulation C) Implementation	D	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	The process of finding the maximum or minimum value of a function subject to constraints is _____	D) Optimization			
118.	Fill in the gap with the most appropriate word combination. A mathematical equation that represents the relationship between inputs (such as labor and capital) and outputs (such as goods or services) is _____	A) Rational function B) Production Function C) Correlation Function D) Optimization Function	B	РД-1 РД-2 РД-3	1
119.	Fill in the gap with the most appropriate word combination. A mathematical representation of a real-world economic system used to make predictions and analyze behavior is _____	A) Graph B) Chart C) Model D)Function	C	РД-1 РД-2 РД-3	1
120.	Fill in the gap with the most appropriate word combination. A mathematical statement that asserts the equality of two expressions is _____	A) Equation B) Chart C) Function D) Graph	A	РД-1 РД-2 РД-3	1
121.	Fill in the gap with the most appropriate word combination. A statistical technique that examines the relationship between one or more independent variables and a dependent variable is _____	A) Inferential Analysis B) Mechanistic Analysis C) Exploratory Analysis D) Regression Analysis	D	РД-1 РД-2 РД-3	1
122.	Fill in the gap with the most appropriate word	A) Target Testing B) Result Testing	C	РД-1 РД-2	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	combination. A statistical method used to test the validity of a claim or hypothesis about a population parameter is _____	C) Hypothesis Testing D) Group Testing		РД-3	
123.	Fill in the gap with the most appropriate word combination. Mathematical, statistical, and instrumental methods play a crucial role in _____ by enabling economists to analyze data, make predictions, and test theories.	A) science B) politics C) economics D) management	C	РД-1 РД-2 РД-3	1
124.	Fill in the gap with the most appropriate word combination. _____ models are often used to represent economic theories, make predictions about future outcomes, and analyze the impact of policy changes.	A) Statistical B) Functional C) Instrumental D) Mathematical	D	РД-1 РД-2 РД-3	1
125.	Fill in the gap with the most appropriate word combination. _____ methods in economics involve collecting, analyzing, and interpreting data to test hypotheses and make inferences about economic relationships.	A) Main B) Statistical C) Mathematical D) Instrumental	B	РД-1 РД-2 РД-3	1
126.	Fill in the gap with the most appropriate word combination. As a rule, _____ is equally distributed between the partners.	A) Authority B) Charge C) Domination D) Strength	B	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
127.	Fill in the gap with the most appropriate word combination. The business _____ is again starting to pay very close attention to the country's economic health.	A) Population B) Public C) Community D) Neighborhood	C	РД-1 РД-2 РД-3	1
128.	Fill in the gap with the most appropriate word combination. Market prices are determined by the interaction of supply and _____.	A) Request B) Order C) Need D) Demand	D	РД-1 РД-2 РД-3	1
129.	Fill in the gap with the most appropriate word combination. As the price of a commodity rises', overall _____ decreases and consumers move toward relatively less expensive goods.	A) Leverage B) Influence C) Purchasing power D) Weight	C	РД-1 РД-2 РД-3	1
130.	Fill in the gap with the most appropriate word combination. The embattled _____ struck a deal with a rival businessman in an attempt to save his teetering business empire.	A) Entrepreneur B) Contactor C) Purveyor D) Borrower	A	РД-1 РД-2 РД-3	1
131.	Fill in the gap with the most appropriate word combination. _____ is a comprehensive and structured approach to gathering and summarizing evidence related to a specific	A) Systematic Review B) Publication Bias C) Meta-Analysis D) Selection Bias	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	research question in economics.				
132.	Fill in the gap with the most appropriate word combination. A comprehensive plan for identifying relevant studies in published and unpublished literature using specific search terms and databases in economics research is _____	A) Search Strategy B) Selection Bias C) Heterogeneity D) Funnel Plot	A	РД-1 РД-2 РД-3	1
133.	Fill in the gap with the most appropriate word combination. The process of making predictions about future trends based on past data is _____	A) Regression analysis B) Forecasting C) Time series analysis D) Quality Assessment	B	РД-1 РД-2 РД-3	1
134.	Fill in the gap with the most appropriate word combination. The systematic and standardized process of collecting relevant data for the purpose of analysis and synthesis in economics systematic reviews is called _____	A) Exclusion Criteria B) Data Extraction C) Narrative Synthesis D) Regression analysis	B	РД-1 РД-2 РД-3	1
135.	Fill in the gap with the most appropriate word combination. The difference between the observed value and the true value of the dependent variable in a regression model is called _____	A) Error term B) Endogeneity C) Heteroskedasticity D) Exclusion Criteria	A	РД-1 РД-2 РД-3	1
136.	Fill in the gap with the most appropriate word combination.	A) Decision tree model B) Markov model C) Budget impact analysis	A	РД-1 РД-2 РД-3	1

№ п/п	Содержание вопроса	Варианты ответов	Правильны й ответ	Результат обучения	Время выпол- нения (мин.)
	_____ is a graphical representation of the possible decisions and their outcomes in a sequential manner.	D) Tobit model			
137.	Fill in the gap with the most appropriate word combination. A statistical test to determine if one time series variable can predict another time series variable is called _____	A) Panel data B) Granger causality C) Maximum likelihood estimation D) Quantile regression	B	РД-1 РД-2 РД-3	1
138.	Fill in the gap with the most appropriate word combination. _____ is a check issued by the company but have not yet been presented for payment at the bank.	A) Outstanding check B) Deposit in transit C) Bank reconciliation D) NSF Check	A	РД-1 РД-2 РД-3	1
139.	Fill in the gap with the most appropriate word combination. _____ is a monthly statement received from the bank that shows all the transactions affecting the bank account.	A) Bank Statement B) Reconciling Items C) Float D) Adjusted Bank Balance	A	РД-1 РД-2 РД-3	1
140.	Fill in the gap with the most appropriate word combination. _____ is a statistical technique used to explore sources of variability in the results of multiple studies.	A) Cost-effectiveness analysis B) Quality-adjusted life years C) Incremental cost-effectiveness ratio D) Meta-analysis	D	РД-1 РД-2 РД-3	1
141.	Fill in the gap with the most appropriate word combination. One of the instruments of	a) Collection of funds to the budget B) Issue of money C) Change in the reserve rate D) Change in government	A	РД-1 РД-2 РД-3	1

		F) for conceiving G) a theoretical framework			
5.	Put the words into correct order to build the sentence.	A) market dynamics B) organizations C) in response to D) new opportunities E) can seize F) continuously evolving	B, E, D, C, F, A	РД-1 РД-2 РД-3	3
6.	Put the words into correct order to build the sentence.	A) to better connect B) and C) be taken D) build loyalty? E) with customers F) what steps G) should	F, G, C, A, E, B, D	РД-1 РД-2 РД-3	3
7.	Put the words into correct order to build the sentence.	A) so crucial B) why is C) seeking D) a Business Model E) to remain competitive? F) for organizations	B, C, D, A, F, E	РД-1 РД-2 РД-3	3
8.	Put the words into correct order to build the sentence.	A) outlines B) an organization employs C) the methods D) its objectives E) to achieve F) a business model	F, A, C, B, E, D	РД-1 РД-2 РД-3	3
9.	Put the words into correct order to build the sentence.	A) critical aspect of B) is C) target D) the identification of E) a business model F) customer segments	A, E, B, D, C, F	РД-1 РД-2 РД-3	3
10.	Put the words into correct order to build the sentence.	A) to convert B) quantitative statements C) into D) Econometrics E) the qualitative statements F) is G) prime function	D, G, F, A, E, C, B	РД-1 РД-2 РД-3	3
11.	Put the words into correct order to build the sentence.	A) never fixed B) and C) why is	C, G, E, F, B, A, D	РД-1 РД-2 РД-3	3

№ п/п	Содержание вопроса	Варианты ответов	Верный ответ	Результат обучения	Время выпол- нения (мин.)
		D) over time? E) of the data F) always rotating G) the variance			
12.	Put the words into correct order to build the sentence.	A) to be B) the pioneers C) of econometrics? D) what E) scientists F) are considered	D, E, F, A, B, C	РД-1 РД-2 РД-3	3
13.	Put the words into correct order to build the sentence.	A) between B) and C) should be D) the empirical relationship E) domestic prices F) positive G) foreign prices	D, C, F, A, E, B, G	РД-1 РД-2 РД-3	3
14.	Put the words into correct order to build the sentence.	A) to represent B) between two variables C) the relationship D) which E) in economics? F) is often used G) mathematical concept	D, G, F, A, C, B, E	РД-1 РД-2 РД-3	3
15.	Put the words into correct order to build the sentence.	A) is B) of inflation C) in monetary policy? D) targeting E) what F) the primary objective	E, A, F, D, B, C	РД-1 РД-2 РД-3	3
16.	Put the words into correct order to build the sentence.	A) is B) of the model C) at disposal D) the next step E) using economic data F) the unknown variables G) to estimate	D, A, G, F, B, E, C	РД-1 РД-2 РД-3	3
17.	Put the words into correct order to build the sentence.	A) tests B) skill C) and expertise D) the econometrician's E) in the field? F) what step	F, A, D, B, C, E	РД-1 РД-2 РД-3	3

№ п/п	Содержание вопроса	Варианты ответов	Верный ответ	Результат обучения	Время выпол- нения (мин.)
18.	Put the words into correct order to build the sentence.	A) helps businesses B) and C) in the market D) identify gaps E) market research F) understand G) their competition	G, A, D, C, B, E, F	РД-1 РД-2 РД-3	3
19.	Put the words into correct order to build the sentence.	A) market research B) businesses C) consumer preferences D) into E) with valuable insights F) conducting G) can also provide	F, A, G, B, E, D, C	РД-1 РД-2 РД-3	3
20.	Put the words into correct order to build the sentence.	A) can B) the market's potential? C) by D) gain insights E) a company F) what means G) into	C, F, A, E, D, G, B	РД-1 РД-2 РД-3	3
21.	Put the words into correct order to build the sentence.	A) a company B) when C) should D) the competitors? E) stick to F) what line G) it comes to	F, C, A, E, B, G, D	РД-1 РД-2 РД-3	3
22.	Put the words into correct order to build the sentence.	A) into B) shared characteristics C) the potential market D) distinct groups E) market segmentation F) based on G) involves dividing	E, G, C, A, D, F, B	РД-1 РД-2 РД-3	3
23.	Put the words into correct order to build the sentence.	A) of a group B) at a given time C) or society D) social mood E) and sentiment F) the collective psychology G) refers to	D, G, F, E, A, C, B	РД-1 РД-2 РД-3	3
24.	Put the words into correct order to build the sentence.	A) keep in mind B) what C) when	B, F, G, A, C, E, D	РД-1 РД-2 РД-3	3

№ п/п	Содержание вопроса	Варианты ответов	Верный ответ	Результат обучения	Время выпол- нения (мин.)
		D) to predict socioeconomic trends? E) applying socionomics F) key points G) should we			
25.	Put the words into correct order to build the sentence.	A) identifies B) modern C) the way of data modeling D) taking into account E) different types of F) mathematical science G) statistical methods	B, F, A, E, G, D, C	РД-1 РД-2 РД-3	3
